

SegriBox: Ultra High Speed Inspection Box

Product Name: Segribox by Segritech

Model: SB100

Version: 1.0

Release Date: 01/07/2025

Developed By: Segritech.

1. Product Overview

The Segritech Inspection Box is a high-speed, AI-powered grading and inspection system engineered to assess the external quality of fruits and vegetables with unmatched precision. Designed for real-time deployment in farms, packhouses, mandis, and supply chain centers, this compact device brings cutting-edge computer vision and AI technology directly to the field.

2. Original Image of The Product:

2. Technical Specifications

Parameter	Value
Inspection Speed	10 fruits/sec (real-time)
Frame Rate	200–300+ fps
Accuracy (Visual Defects)	>95% (depending on crop type)
Crop Compatibility	15+ Fruits & Vegetables
Connectivity	USB, LAN, Optional 4G/Wi-Fi
Power Supply	230V AC / UPS Compatible

3. Key Features

✓ AI-Powered Quality Inspection

Advanced vision algorithms assess external defects, color, size, and surface quality with accuracy at over 200–300 frames per second (fps).

✓ Ultra-High-Speed Processing

Capable of inspecting up to 10 fruits per second, ensuring seamless operation even during peak harvest seasons.

✓ Plug-and-Play Operation

Fully enclosed, dust-resistant, and field-ready — deploy it instantly at sorting stations, packhouses, or mobile grading lines.

✓ Multi-Crop Compatible

Pre-trained and adaptable for a wide range of produce:

Fruits: Apple, Pomegranate, Orange, Mango, Kiwi, Sapota, Guava, Strawberry, Avocado

Vegetables: Tomato, Potato, Onion, Lemon, Capsicum, and more

✓ **Compact**

Size: 2 ft (H) × 1.5 ft (W) × 2 ft (L)

Easy to transport and integrate with your existing grading/sorting line.

✓ **Edge AI + Cloud Sync**

Process locally, sync globally. Built for rural and semi-urban conditions with optional cloud-based analytics and remote diagnostics.

✓ **Real-Time Insights**

Instant categorization (Grade A/B/C), defect tagging, and dashboard reports with seamless integration into ERP or mobile apps.

4. Applications

- FPOs & SHGs – Enable farmers to capture better prices with sorted produce
- Export Houses – Grade produce for global markets with uniformity
- Agri-Tech Startups – Plug into post-harvest automation workflows
- Mandi Operators – Speed up daily grading and auctioning
- Cold Chain & Processing Units – Ensure only the best produce is stored or processed

5. Key Advantages of the SegriBox

Unmatched Skin Defect Detection- This can even detect surface bruising smaller than a fingernail, micro-cracks on pomegranates/apples, or even tiny fungus specks on citrus fruits. Color deviations on mango skin (like sap burn) and calyx-end cuts less than 2mm wide, which can be missed in manual grading.

Reduced Waste = Higher Profit

By separating Grade B/C produce early, Segritech enables better channeling into processing or secondary markets — helping partners recover up to 20–30% more value per harvest.

Your Grading Guarantee

💡 If the box fails to grade with 90% accuracy within the first season of calibrated use, we offer a no-questions-asked replacement.

6. Why Segritech?

- Made in India AI Inspection Technology: Purpose-built for Indian farmers and exporters.
- Scalable Tech Stack: Seamless integration with traceability and ERP systems for packhouses.
- Built for Bharat: Designed in India, for the Indian agri economy—robust, serviceable, and portable.
- Trusted by Leaders: Developed under guidance from the IIT Bombay & IIIT-Hyderabad ecosystem, TiE Global network, and field validation with leading agri players.
- Committed to Excellence: Cutting edge technology provider, prompt support, and continuous R&D for evolving crop needs.
